

Emergency Response Training

Course Background:

This course is designed to provide participants with the skills and knowledge needed to provide emergency first aid. Emergency first responders can be the difference between life and death in many emergency situations.

Course Content:

- Legislation
- Role and responsibilities of an emergency response team
- Use of breathing apparatus
- Response procedures for chemical spills
- Working in heat and smoke
- Understanding fires
- Locating and fighting the fire
- Search and rescue procedures
- Command and control
- Use of fire fighting equipment
- Practical exercises

Learning Outcomes:

Upon successful completion of this course participants will gain the skills and knowledge necessary to:

- Operate a system of command and control
- Fight the fire and deal with chemical spill
- Operate breathing apparatus
- Take control of an emergency until replaced by emergency services
- Use all variations of fire fighting and chemical spill response equipment
- Perform search and rescue

Unit 630G, Northern Extension, IDA Industrial Park, Waterford, Ireland.
