

## Emergency Medical Technician Course

### Course Background:

This course is essential for anyone wishing to register as an EMT under the Pre - Hospital Emergency Care Council. This course is recognised by PHECC as a level 4 practitioner course.

### Course Content:

- Introduction to pre-hospital emergency care
- Patient assessment
- Respiratory emergencies
- Medical emergencies
- Obstetric emergencies
- Trauma
- Paediatric emergencies
- Pre-hospital emergency care operations
- Professional development
- Clinical procedures

### Learning Outcomes:

Upon successful completion of this course, participants will have gained the knowledge and skills necessary to work in emergency care as an emergency medical technician.

### This Course is Designed For:

Anyone wishing to pursue a career in the emergency services

## **Training Methodology:**

This course is classroom based and it is highly interactive with role-playing playing and practical exercises to reinforce the participants understanding and learning. Students will also undertake a minimum of 40 hours clinical placement (observation) in order to prepare completely for working in emergency services.

## **What to Bring to the Course:**

While pens and paper will be supplied, participants are free to bring their own.

## **Duration of the Course:**

120 hours classroom based learning (19 days)

40 hours clinical placement

## **Participants:**

A maximum of 12 per course

## **Certification:**

Upon successful completion of this course participants receive a (NQEMT) National Qualification in Emergency Medical Technology.
